

IBM Research Triangle Park Theme Briefing Events

IBM RTP Executive Briefing Center in Research Triangle Park, NC offers you an opportunity to see and hear about the new products that will enable you to build a new dynamic infrastructure (DI) with specialized solution-based focus allowing you to meet your needs.

February 25
May 12

BladeCenter In-Depth Briefing - IBM BladeCenter helps any size organization realize business innovation with a flexible, scalable architecture that lets you choose the right solution for your dynamic business. IBM BladeCenter® OpenFabric Manager and Virtual Fabric Manager can provide enhanced management features for deployment and recovery and are elements of a flexible infrastructure.

April 6

Hosted Client Environment Solutions Briefing - Today's desktop environment continues to suffer rising costs of maintenance and management, escalating security issues and further contributions to energy consumption challenges. IBM and our technology partners can help you take control of these assets and reduce your costs via a hosted client environment and a new range of technologies.

April 20
June 15

eX5 In-Depth Briefing - Space constraints, maxed out power, rising management costs and underutilized servers with costly software licenses are key challenges of today's data centers. IBM's next generation Enterprise X-Architecture is specifically designed to respond to these challenges with leadership performance, new levels of server and blade scalability and unmatched reliability for higher workload utilization and consolidation
