Skiing Extravaganza

Copper Mountain is just 75 miles from Denver with 2,450 acres of skiable terrain.

Base Elevation: 9,712 Ft.
Vertical Drop: 2,601 ft.
22 Lifts, 126 Marked Trails

Copper Mountain Ski Resort

Every year we offer to take the class skiing on the third day. Last year we all met at Copper Mountain's Lodge. Cisco provided the Ski Pass, Rentals if you needed them, and offered a guided tour by the Copper Mountain Ski Concierge. The best part of the guided tour was our ability to avoid long lines and the personal tour of the mountain. The tour consisted of skiing Intermediate runs. For those interested in more advanced slopes, our guides pointed out the best mogul runs and the finest power that could be found.

Hosted Events

Cisco provides continental breakfast and lunch on both days of class, and a dinner on the evening of the first class. For those needing rental ski equipment, please plan on joining us the evening of Feb. 3rd at the local ski shop in Englewood so we can pick up your rentals. We will carpool to the mountain and then break up into groups and offer a Cisco host per group.

Best of the Best

At the Cisco Top-gun, you will have an opportunity to work with the best of the best. We have our best

technical experts teaching you about the latest and greatest products and roadmaps. You will get hands on labs for the Nexus 7k, Nexus 5k, Nexus 2k, Nexus 1k, and MDS products. We will provide live demonstrations of the Nexus 4k integrated with an IBM BladeCenter H chassis.
